

Shamik Mukherjee

Product Owner

Personal Details

Date of Birth:	09 February 1988
Nationality:	Indian
Marital Status:	Married
Relocation:	Chancenkarte (Opportunity Card) – applied, on the waitlist for pre-authorisation

Profile

Product Owner with 4+ years in end-to-end product ownership, drawing on 13+ years in technology, delivery, and payments – specialising in card network integrations, tokenisation, and mobile wallet products (Google Pay, Samsung Pay). Delivered the retrieval flow behind Google Chrome's Virtual Card autofill feature – $900K settled volume in the first 45 days, 275,000+ requests in the first 60. Combines deep PO delivery experience with a background in pre-sales solution architecture and commercial bid management. Uses AI tooling (Gemini) daily at work, and directs several AI models, including Claude Code, ChatGPT and Perplexity, to build open-source AI tooling outside it, approving every merge (see Independent Projects).

Professional Experience

Product Owner, *Cognizant Technology Solutions*, Farnborough, UK — 02/2026 – Present

- Own product backlog for edge applications connecting card network to Google Pay and Samsung Pay – translating requirements into epics, user stories, and acceptance criteria for two agile squads
- Define and maintain B2B integration specifications for wallet provisioning adopted by partner organisations
- Lead wallet provisioning validation across Google Pay and Samsung Pay for a large-scale card migration programme
- Generalised B2B integration specifications to onboard international franchise issuers onto push provisioning, taking the first live in 2025
- Passed an enterprise audit on full B2B specification-change traceability, mapping every change from tracker entry to Jira epic
- Use AI tools (Gemini) daily to accelerate requirements drafting and refine acceptance criteria

Product Owner (Proxy) & Onsite Delivery Manager, *Cognizant Technology Solutions*, Farnborough, UK — 05/2022 – 01/2026

- Owned the retrieval flow behind a Virtual Card autofill feature end-to-end – launched to 100% of eligible cardholders (Nov 2024), 275,000+ successful requests in first 60 days, $900K settled volume in first 45 days
- Delivered Issuer Push Provisioning into Google Wallet, defining the network-side B2B specification adopted by issuer bank partners
- Traced a critical latency risk via Datadog to a downstream partner dependency and worked cross-team to cut risk-checked response times from 7-8s to 3.5-4s, meeting Google's strict 5-second SLA
- Enforced a rigorous Definition of Done across multi-environment CI/CD deployments; personally authored Google's partner certification test cases for the Retrieval flow
- Served as onsite point of contact for client engineering leadership – escalation management, stakeholder governance, resource onboarding
- Recognised with 'Star Award – Excellence in Delivery' (December 2024)

Professional Experience

Pre-Sales Solution Architect, *Cognizant Technology Solutions*, Kolkata, India 07/2019 – 04/2022

- Progressed to the most senior individual contributor level in the pre-sales function
- Architected and won proposals totalling >$100M TCV across DevOps transformation, test automation, and quality engineering programmes for banking clients
- Formulated Go-to-Market strategy and roadmap for BFS Quality Engineering & Assurance North America (2020, 2021) and the Product Testing group (2019)
- Co-authored Cognizant Cheers Award-winning whitepaper, "Digital Transformation – A Quality Engineering Perspective", used as client-facing sales collateral across the practice
- Mentored two cohorts of summer interns (2020, 2021), producing POV documents on LIBOR Transition and Contact Centre Modernization that fed into active client pursuits

Pre-Sales Lead / Senior Analyst, *Cognizant Technology Solutions*, Kolkata, India 01/2016 – 06/2019

- Managed the full bid lifecycle (RFP/RFI response, solution design, commercial modelling, pricing strategy) across the banking and financial services portfolio
- Formulated Go-to-Market strategy and roadmap for BFS Quality Engineering & Assurance North America and the Product Testing group
- Coordinated across sales, delivery, and Centre of Excellence teams to align solution design with client priorities and business goals

Business Analyst & Test Lead, *Cognizant Technology Solutions*, Kolkata, India 08/2014 – 12/2015

- Led a team of 10 QA engineers validating the transaction authorisation module during a major card network upgrade, including testing of new tokenisation capabilities
- Led a separate team of 6 engineers for merchant billing report certification following a revamped billing structure

Presales Consultant, *Cognizant Technology Solutions*, Pune, India 05/2014 – 08/2014

- Joined in a pre-sales consulting capacity supporting the BFS Quality Engineering & Assurance practice, contributing to bid responses and solution development before transitioning into a client-facing delivery role

Software Engineer (Java), *Tata Consultancy Services*, Mumbai, India 12/2010 – 06/2012

- Engineered enhancements to dematerialisation, rematerialisation, and securities transfer modules for India's largest securities depository

Independent Projects

OpenCAM Framework, *Open-source, synthetic data only* 09/2026 – Present

- Directed several AI models to build a multi-agent Maker-Checker credit-underwriting framework: Claude Code for most of the build and for merges (each on my explicit approval), ChatGPT and Perplexity for raising PRs, Perplexity also reviewing; a deterministic policy engine enforces the covenant rules; every PR carries an AI-assistance disclosure; not production-approved
- A codebase audit caught a correctness bug (a debt-free company's DSCR silently evaluated as 0) before it reached a credit decision, proving the value of deterministic policy-gating over raw LLM output

AI Job Search Automation, *Solo-built, forked & extended* 08/2026 – Present

- Forked an open-source job-search framework and directed Claude Code to build custom enhancements on top of it (Gmail sync, dedup logic, a live dashboard)

Education

M.Mgmt. (MBA equivalent), *SJMSOM, IIT Bombay*, Mumbai, India 2012–2014
Business Administration & Management – GPA: 8.38 / 10.0

B.Tech., Computer Science, *West Bengal University of Technology*, Kolkata, India 2006–2010
GPA: 8.47 / 10.0

Skills

Product Management	Backlog Ownership, Epic / Story Elaboration, Acceptance Criteria, PI Planning, MVP Definition, Release Planning, Sprint Prioritisation
Agile & Delivery	Scrum, SAFe, Sprint Planning & Reviews, Cross-functional Dependency Management, Delivery Governance, Stakeholder Management
Payments & Domain	Digital Payments, Tokenisation (EMV / Virtual Cards), Wallet Integrations (Google Pay, Samsung Pay), Issuer Push Provisioning, B2B Integration, Regulatory Compliance (RBI, PCI)
Commercial & Pre-Sales	Business case development, bid management (RFP/RFI), commercial modelling (TCV >$100M), Go-to-Market strategy
AI Tools	Gemini (Epic / Story Drafting, Stakeholder Communication, Requirements Analysis)
AI-Directed Delivery	Multi-agent system architecture, AI-output governance, prompt architecture – directed several AI models (Claude Code, ChatGPT, Perplexity) on an open-source credit-underwriting framework, and Claude Code on a job-search automation fork (see Independent Projects)
Software	Jira, Confluence, SQL, Microsoft Office 365

Languages

English	C2 – Full professional proficiency (native / working language)
Bengali	Native speaker
Hindi	C1 – Highly proficient
German	A0 – Beginner, currently learning

Honours and Awards

Star Award – Excellence in Delivery – Cognizant Technology Solutions (2024)

Cognizant Cheers Award – for co-authored whitepaper on digital transformation

Reading, DD.MM.YYYY
